## CONSULTING

Provided by senior level law enforcement technology, communications, and records management professionals.

## OUR PHILOSOPHY

**We don't interfere.** To help you achieve the desired results we first distinguish between what is wanted and what is needed. Upon conferring with our counterparts in a consulting project we assess current conditions, communicate with project stakeholders, and develop a plan of action without interfering with your day to day work. We always consider the unique organizational culture of each client and tailor our approach based on your needs.

**Affordability.** Utilizing the resources of a consultant is an important decision. Unlike large consulting firms which charge exceptionally high fees, we work solely on police records and information management projects. With a well founded understanding of budgetary constraints we offer affordable services provided by actual law enforcement practitioners. Large mega-sized consulting companies typically have a core set of skills but no experience in UCR, public records, crime stats, dispatch, and police records management protocol in general.

- + UCR report and crime statistic assessments.
- + RMS/CAD project management.
- + Vendor evaluation and recruitment.
- + Document conversion projects.
- + Records unit assessments and reengineering.
- + Code table development/correction
- + Records management solutions.

## RESULTS

### Technology Projects

- Completion of project on time and within budget.
- Prevention of runaway overtime from use of internal resources.
- Reduced learning curve.
- Advanced training beyond the basics provided by vendor.

### Records Management Projects

- Lower report turnaround time.
- Accurate crime stats
- Ensured compliance with public records law.
- Lower report error rates.
- Efficient flow of information.
- Efficient space utilization.
- Organization of critical information.
